

A permanent position (Research Engineer IR CNRS) is open in the institute (Ecologie, Systématique & Evolution) based in Orsay, near Paris. This job is available to all nationalities. The requested level is PhD or university degree in engineering.

The successful candidate will be in charge of a flux tower over a deciduous oak forest near Paris (running since 2005). This site is part of CarboEurope and has vocation to join ICOS European network. A strong background in ecophysiology and bioclimatology is required, as well as competences in eddyflux hardware and data treatment. A basic level in French is needed.

Candidatures will close on July 9 and auditions will take place in autumn. Auditions last 30 minutes [talk in French (10 min) and interview (20 min)]. Position will start in December 2010. Gross salary is about 25 KEuros per year or more depending on experience.
