Six Co-Chief editors :

Dr. Erwin Dreyer, INRAE, France
Dr. Andreas Bolte, Thunen Institute Forest Ecosystems, Germany
Dr. Marco Ferretti, Swiss Federal Research Institute for Forests, Snow
and Landscape WSL, Switzerland
Dr. Jean-Michel Leban, INRAE, France
Dr. John Lhotka, University of Kentucky - Department of Forestry, USA
Dr. Shuguang Liu, National Engineering Laboratory for Applied Technology
of Forestry & Ecology in South China, China

Editorial Coordinator : Véronique Lesage annforsci@inrae.fr

A few reasons why you should publish your research in Annals of Forest Science...

A broad scope

- Biology of trees and associated organisms;
- Forest dynamics and ecosystem processes under environmental or management drivers (ecology, genetics);
- Risks and disturbances affecting forest ecosystems (biology, ecology, economics);
- Forests as drivers of the bioeconomy (tree breeding, forest management and productivity, ecosystem services, silviculture);
- Wood sciences (relationships between wood structure and tree functioning, and between forest management or environment and wood properties).

A large range of publishing formats

AFS publishes original research papers, data papers, letters to the editor, opinion papers, and review papers. We provide templates to guide you while preparing a manuscript in the different formats; see: <https://www.springer.com/journal/13595/submission-guidelines>

A strong commitment in favour of open science

Annals of Forest Science is committed to take all initiatives to favor the free dissemination of research results:

1. Full open access to all papers

Annals of Forest Science switches to full open access publication from January 2022 on. This enables free access to all published material with no pay wall. For more details, see: <https://www.springer.com/journal/13595/updates>

2. Open data in forest science

Annals of Forest Science publishes data papers presenting a diversity of data sets made available to the broader community. In addition, Annals of Forest Science strongly supports the access to all data associated to the published papers. See our blog page: <https://ist.blogs.inrae.fr/afs/2019/07/24/guidelines-for-authors-how-to-share-your-datasets/>

3. A “Peer community in Forest & Wood Sciences” friendly journal

Annals of Forest Science encourages authors to submit manuscripts that were already deposited in pre-print repositories. Moreover, the recommendations produced by a Peer Community (particularly the Peer Community in Forest & Wood Sciences - <https://forestwoodsci.peercommunityin.org/>) will be taken into account during the review process.

Topical collections

Published papers may be included in topical collections (see the list on our website). You are invited to suggest topics and papers for Topical Collections around a timely question or a symposium.

The highest scientific reviewing standards

Only high quality papers are published. Your manuscript is reviewed by international referees selected by the Editorial Board, under a double-blind procedure.

Rigorous application of publication ethics

AFS refers explicitly to the code published by the committee on publication ethics (COPE, <http://publicationethics.org>) and to the San Francisco declaration on Research Assessment (DORA, <http://am.ascb.org/dora>).

Continuous Article Publishing

Your paper will be published online immediately after receipt of the corrected proofs. This is the official first publication citable with the DOI. Papers are widely disseminated through Springer's websites and easily accessed by a large research community.

AFS blog and twitter

AFS publishes a blog advertising papers from the journal as well as topics of interest to our readers and authors. Comments on published papers are welcome (<http://ist.blogs.inrae.fr/afs/>). Follow @AnnForSci for the latest article published and forest-related news in English and French.

A long established and internationally recognized journal

Annals of Forest Science was launched 1964 and has a long history of commitment in support of Forest Research. It ranks in the first quartile of Forestry Journals in many different rankings. See our website for more details.

**Annals of Forest Science is a journal of INRAE,
the French national institute for Agriculture,
Food and the Environment, published by Springer.**
